// ALFAGOMMA STEAM HOSE & FITTING SOLUTIONS

ALFAGOMMA offers a wide range of high quality, safe and reliable steam hose and different solutions of fittings and hose assemblies to match market requirements.

// HOSE

- Low and high pressure saturated steam range - max WP 6/18 bar
- Conductive tube - electrical resistance $\leq 10^6$ Ohm/length
- ISO 6134 compliant products class A and B (oil resistant cover)
- Extra safe construction - 18 bar hose
 - // EPDM or chlorobutyl extruded tube suitable for both saturated and superheated steam up to 232 °C
 - // one or two high tensile steel wire braids
 - // black cover hose electrically conductive and suitable to be used in potentially explosive environments

// FITTINGS

- Clamped solution
- Crimped solution

// FITTINGS & HOSE ASSEMBLY SOLUTIONS

// CLAMPED SOLUTION

- EN 14423 / DIN 2826 couplings & safety clamps
- GROUND JOINT SEAL couplings & safety clamps

EN 14423 / DIN 2826 COUPLINGS & SAFETY CLAMPS

Connection type:

- BSPT Male thread
- BSPP Female thread
- PN40 flange

Size: 1/2" – 2"

Material: Stainless steel – Brass – Plated steel

GROUND JOINT SEAL COUPLINGS & SAFETY CLAMPS

Connection type:

- BSPT/NPT Male thread
- BSP/NPT Female thread

Size: 1/2" – 4"

Material: Plated steel – Malleable iron

// CRIMPED SOLUTION

Our lengthy experience in hydraulic hose assembly has been applied to industrial steam applications! ALFAGOMMA provides a high quality, tested crimped solution, in different terminations to match the market and customer needs.

For 18 bar steam hose:

- Hydraulic Alfacrimp one-piece fittings
- Ground joint seal couplings - crimpable - NPT thread
- Turnex P coupling

// FOR 18 BAR STEAM HOSE

HYDRAULIC ALFACRIMP ONE-PIECE FITTING BSP/NPT THREAD

Other terminations available in hydraulic catalogue

GROUND JOINT SEAL COUPLING - CRIMPABLE NPT THREAD

Special hose shank designs compatible with:

- Hydraulic ferrule
- Ground Joint safety bolt clamps

Available for North American market

TURNEX P COUPLING

Size: 3/4" – 1"

Material: Plated steel

To be assembled with: Alfacrimp
Hydraulic Ferrule

* Not precrimped

// BENEFITS OF THE CRIMPED STEAM HOSE ASSEMBLY

MAIN BENEFITS:

- ▲ INCREASED SAFETY FOR STEAM APPLICATIONS
- ▲ SUPERIOR FITTING RETENTION
- ▲ PREVENTION OF LEAKS
- ▲ EXTENDED PRODUCT LIFE
- ▲ TIME SAVING: NO LOOSE OR WARPED BOLTS TO MAINTAIN
- ▲ LIGHT WEIGHT

- // The ALFAGOMMA hose assembly is guaranteed at the maximum rated hose working pressure
- // The crimped couplings:
 - reduce risk of leaks and ejection of the fitting
 - eliminate bulky bolt clamps and reduce risk of injury or damage
- // The pin-pricked hose cover prevents blistering
- // The crimped hose assembly is lighter in weight compared to the standard clamped assembly: this gives a better manageability of the steam hoses and decrease the risk of back pain for the operator

// STEAM HOSE SAFETY GUIDE

Handling steam is a very hazardous situation. Using care and some safety precaution can minimise or eliminate personal or property damage.

(Reprinted from RMA IP-11-1 Steam Hose)

SELECTING AND USING STEAM HOSE

1. Make sure steam hose is identified as a steam hose. It should be branded as such, stating working pressure and temperature rating
2. Make sure working pressure and temperature is not exceeded
3. Do not allow hose to remain under pressure when not in use
4. Avoid excess bending or flexing of hose near the coupling. Straight line operation is preferred. If bends are necessary as part of operation, spring guards may help
5. Be sure and use recommended steam hose couplings and clamps on hose.

MAINTENANCE OF STEAM HOSE

1. Periodic inspection of hose should include looking for cover blisters and lumps
2. Check for kinked areas that could damage hose
3. Drain hose after each use to avoid tube damage before hose is put back in operation, to avoid "popcorning" of the tube
4. Check tightness of clamps bolts after each use
5. Check to see if clamps halves are touching. If they are, recouple hose with smaller clamps to insure proper tightness or grip around hose
6. Do not store hose over hooks
7. Steam hose lying on metal racks or installed around steel piping will dry out the hose, causing tube and cover cracking.

CORROSIVE STEAM

When the water used to generate steam contains dissolved air, oxygen or carbon dioxide, then these gases end up as contaminants in the steam. At high temperatures of steam both oxygen and carbon dioxide are extremely corrosive. Carbon dioxide is acidic and therefore attacks metals whereas the oxygen corrodes metals and oxidises rubbers. Corrosion of metals in the presence of both oxygen and acids is forty times faster than with either alone. Boiler water is therefore normally treated not only to remove the "hardness" which would cause "furring" of the boiler but also to remove dissolved oxygen and carbon dioxide and to ensure that the steam is not only not acidic but even slightly alkaline. Boiler water treatment is a specialised subject beyond the scope of this technical sheet but correct steam generation is important.

DETERIORATION OF STEAM HOSE

Like all rubber products steam hoses have a finite life and are subject to gradual deterioration with use. However, it sometimes happens that hoses which have been giving a good life suddenly start failing without apparent reason. In such cases it is often a change in the steam conditions causing a rapid acceleration of a normal failure mode. It is therefore useful to consider how steam hoses normally last and thus how the condition of the steam affects hose life.

TEMPERATURE OF SATURATED STEAM

Gauge Pressure		Temperature	
psi	bar	° C	° F
25	1.73	130	267
30	2.07	134	274
35	2.42	138	281
40	2.76	141	287
45	3.11	144	292
50	3.45	148	298
60	4.14	153	307
70	4.83	158	316
80	5.52	162	324
90	6.21	166	330
100	6.90	170	338
120	8.28	177	350
140	9.66	182	361
160	11.04	188	371
180	12.42	193	379
200	13.80	198	388
225	15.53	203	397
250	17.25	208	406
275	18.98	212	414
300	20.70	216	422
325	22.43	221	429
350	24.15	225	437

The chart represents the three forms of water when subjected to heat and pressure. Use only hoses specifically designed for the application.
